

Water and Environment conference

27 April 2009

Water and environmental management are critical to our long-term future, through offering sustainable solutions to some of the most pressing multidisciplinary and diverse issues across all areas of the globe, e.g. depletion of water resources and climate change. Water and environmental management can be interlinked with the developments in areas such as sustainable development, corporate governance, corporate accountability and business ethics.

On April the 27th, 2009, the [Chartered Institution of Water and Environmental \(CIWEM\)](#) hold a two-day annual conference addressing the issues within the global water and environment sector. This conference highlights the present and future policies, initiatives and business responses that have the potential to shape the future of the water and environment sector. As a result it is a key event in the diary for a wide range of key stakeholders at the top of their fields within the water the environment sector, such as policy experts and environmentalists. There will be a mix of key speakers, exhibitions and many networking opportunities. Some of the key speakers for this conference include:

- Professor Sir David King (former Chief Scientific Advisor to the UK Government)
- Lord Chris Smith (Environment Agency)
- Philip Fletcher CBE (OFWAT)
- Dr Chris West (UK Climate Impacts Programme)

The CIWEM conference will cover a wide range of topics within water and environmental management, including: water management; flood risk management; river basin management; environment sector policy and legislation; and climate change.
